

Vivity™	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Does IOL centration/tilt affect the performance of Vivity IOLs?	Yes
	What are the visual outcomes and patient satisfaction with Vivity in post hyperopic refractive surgery patients?	Yes
	What are the visual outcomes with Vivity in post myopic refractive surgery patients?	Yes
	What are the visual outcomes with Vivity in post hyperopic refractive surgery patients?	Yes

ARGOS™ / Alcon Image Guidance System	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	What are the refractive and visual outcomes with ARGOS Biometer and Alcon image guidance in post-refractive eyes?	Yes
	What is the repeatability of ARGOS measurement compared to new competitor biometers (e.g EyeStar, Anterior) and what are the refractive outcomes when using optimized lens constants and a specific IOL power calculation formula for each biometer?	Yes

Contoura®	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	How do clinical outcomes from Contoura with Phorcides compare to SMILE?	Yes
	How do retreatment rates from Contoura with Phorcides compare to SMILE?	Yes
	How do clinical outcomes from Contoura with Phorcides vs using manifest/topo measurements for treatment planning compare in patients with oblique astigmatism?	Yes

NGENUITY®	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	How are surgeon movements affected when using NGENUITY 1.4 with displayed Centurion Phaco parameters compared to the standard microscope in cataract surgery?	Yes
	How does use of the live-case parameter display (eg. IOP, vacuum, etc) and color visualization on NGENUITY affect surgical efficiency compared to ARTEVO 800?	Yes
	Are there differences in patient outcomes when using NGENUITY compared to the standard microscope in anterior or posterior ophthalmic surgery?	Yes

HyperVit	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	How does Hypervit 20K compare to competitive systems with respect to the level of tractional force/tissue movement, low flow rates and IOP control?	Yes
	How does HyperVit 27-G perform compared to 25-G single-blade cutters in vitreal opacity cases ("floaters") with respect to surgical outcomes and surgical efficiency?	Yes

Advanced UltraVit / HyperVit	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Does the use of the beveled tip vitrector (Advanced UltraVit/HyperVit) allow a single instrument (rather than a pick, forceps, etc) to efficiently perform membrane removal?	Yes

Grieshaber Reflex Handle/ Sharkskin Forceps	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Does the Grieshaber Reflex Handle with Sharkskin Forceps affect surgeon tremor and membrane grasp initiations and attempts?	Yes

HYDRUS	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Does implantation of the HYDRUS Microstent impact patient quality of life?	Yes
	Does AS-OCT microstent placement verification correlate with gonioscopic visual placement and efficacy for HYDRUS when compared to iStent Inject W in cataract surgery patients with POAG?	Yes
	In cataract surgery patients with mild/moderate glaucoma, how do the clinical outcomes of OMNI canaloplasty compare to those of OMNI canaloplasty plus HYDRUS?	Yes

PRECISION1 For Astigmatism	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	How does Precision1 for Astigmatism perform compared to Biotrue ONEDay toric for overall and end of day comfort, vision, and satisfaction and for rotational fit?	Yes

DAILIES TOTAL1 Multifocal	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	What is the performance of DT1 MF in those who previously dropped out of contact lenses due to presbyopia?	Yes
	How does DT1 MF perform vs symptomatic habitual MF reusable lens wearers for hours of comfortable wear and EOD comfort, vision and dryness symptoms?	Yes
	How does the Precision Profile Design (DT1 MF) compare to Oasys 1 day MAX MF for visual performance over a wide range of pupil sizes?	Yes
How does DT1 MF compare to Ultra Multifocal toric in low to moderate astigmats?	Yes	

DAILIES TOTAL1 for Astigmatism	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	How does DT1 for Astigmatism perform in current spectacle lens wearing astigmatic patients who failed with previous toric contact lenses (due to fit or dissatisfaction)?	Yes
	How does DT1 for Astigmatism perform after long hours of digital video or social media streaming?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
T30 Sphere	Is the subjective performance of T30 as good as Crizal spectacle lenses during computer use, near/dist activities, and under fluorescent lighting?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
Systane HYDRATION PF	How does Systane Hydration PF impact dry eye symptoms in post-operative LASIK patients?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
Systane iLux	How do speed to efficacy and treatment time differ between Systane iLux and Lumenis M22 IPL with Optimal Pulse Technology (OPT™)?	Yes
	How do MGD patients who had severe or moderate symptoms at baseline, but remain symptomatic after thermal pulsation respond to additional treatment?	Yes
