

Research Areas of Interest – US

We welcome IIT proposals in the following areas of interest.

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
Vivity™ Extended Vision IOLs	Does IOL centration/tilt effect the performance of Vivity IOLs?	Yes
	What proportion of monovision patients select Vivity over monofocal monovision IOLs after patient education?	Yes
	What proportion of patients select the Vivity vs Diffractive EDOF IOL after patient education?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
Clareon®	What is the wound integrity and surgical induced astigmatism using AutoNoMe as an IOL delivery system?	Yes
	What is the range of vision with Clareon monofocal IOL?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
Hybrid Tip	Does the Centurion Hybrid Tip provide comparable cutting efficiency in different grades of cataract density compared to traditional tips?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
ARGOS™ Biometer	How do refractive and visual outcomes with Argos Biometer with Alcon image guidance when using modern formula (e.g. Barrett TrueK or Barret II) that account for PCA compare to IOL Master 700 in normal eyes?	Yes
	What are the refractive and visual outcomes with Argos Biometer with Alcon image guidance in long and short eyes?	Yes
	What are the surgical efficiency benefits of Argos (with Alcon image guidance) integrated with LenSx and digital markers compared to manual marking for toric IOLs?	Yes

Research Areas of Interest – US

We welcome IIT proposals in the following areas of interest.

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
CONTOURA®		
	Do patient reported outcomes improve postoperatively (3 to 12 months) with Contoura®?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
NGENUITY®	Does NGENUITY® help to reduce symptoms and impact of dry eye over the course of a long OR day for the surgeon compared to analog microscope?	Yes
	How is visualization impacted with color channel optimization of mature cataracts, cortical cataracts, etc. on NGENUITY® compared to analog microscopes?	Yes
	How does NGENUITY® with DataFusion compare to analog microscopes in an academic/resident setting assessing efficiency of learning surgical skills in retinal and anterior segment procedures?	Yes

	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
HYPERVIT DUAL BLADE		
	Does Hypervit Dual-Blade effect the surgeon's ability to complete specific segments of vitrectomy (e.g. core vitrectomy) compared to (non-Alcon) conventional probes?	Yes

Research Areas of Interest – US

We welcome IIT proposals in the following areas of interest.

PRECISION1®	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Does Precision1 for Astigmatism provide better functional vision (particularly for digital device tasks) than P1 spherical equivalent lenses?	Yes
	Are patients more likely to try/wear toric CLs if ECPs proactively offer/fit torics (vs passively waiting for the patient to ask for them)?	Yes
	Are current Biofinity toric wearers satisfied with vision and comfort when refitted into Precision1 for Astigmatism?	Yes
	Does Precision1 for Astigmatism provide a comfortable wearing experience all day (16+ hours)?	Yes

PATADAY	<i>Scientific and medical gaps that need to be addressed</i>	<i>Still accepting applications?</i>
	Is there a difference in comfort (sting/burn) upon instillation between Pataday Once Daily Relief Extra Strength (olopatadine 0.7%) and Alaway?	Yes
	Is there a difference in visual quality upon instillation between olopatadine 0.2% vs. 0.7%?	Yes
